

Open Targets Gentropy

- GWAS Catalog
- FinnGen R12
- UKB-PPP
- eQTL Catalogue

100,526 GWAS / 789,453 CSs /
263,705 replicated CSs

15,730 qualified
diseases

61,885 qualified
measurements

70,618 CSs

450,357 CSs

2,044,305 molQTL CSs

70,400 CS-genes
8,285 unique genes
1,394 unique
diseases

453,009 CS-genes
15,160 unique genes
3,412 unique
measurements

Variant level pleiotropy

20,041 independent clusters
- lead variants
33% - more than one
unique disease
23% - more than one
therapeutic area

Gene level pleiotropy

8,285 unique genes
64% - more than one
unique disease
57% - more than one
therapeutic area

Clinical trials success modelling

ChEMBL:

37,377 T-I pairs: 6,163,
14,410, 12,240, and 4,564
for clinical phases I, II, III,
and IV
